

Delete all tags from a Git repository

<https://stackoverflow.com/questions/19542301/delete-all-tags-from-a-git-repository>

518

```
git tag | xargs git tag -d
```

Simply follow the [Unix philosophy](#) where you pipe everything.

On Windows use git bash with the same command.

272

To delete remote tags (before deleting local tags) simply do:

```
git tag -l | xargs -n 1 git push --delete origin
```

and then delete the local copies:

```
git tag | xargs git tag -d
```
